

# WELCOME TO STENBERG

## Beautiful and completely authentic!

In the governor's farm Stenberg you will experience the unique 1814 environment that has been recreated in the Eidsvoll building. The farmyard, the houses and the park are as they were in the early 19th century, and this was the home of constitution signatory Lauritz Weidemann, his wife Ditlevine and their children. Mjøsmuseet's guide gives you a peek into the lives of the inhabitants of this singular residence. The café Ditlevines utsikt serves exquisite food based on recipes left by the family that lived at Stenberg. The hosts, known from Kulturstua in Rø, arrange unique and delicious food experiences that combine perfectly with our museum.

We accept bookings from groups all year round. The main building is closed during the winter, but there are other interesting houses on site that are available. The visit can also be combined with a visit to one of our other sites, such as the lake's own museum Mjøsas Ark in Kapp.

**Groups up to 15 people: 1000 NOK**  
(minimum price for group booking)

**Groups of more than 15 people:**  
65 NOK per person
